

CoLaborator

At Bayer Crop Science

The CoLaborator is Bayer's newest biotech startup lab space, designed to house and foster innovative new ventures to transform modern agriculture. A flexible, open floor plan with 3,000 square feet of shared lab and office space, the Crop Science CoLaborator will create opportunities for idea exchange by bringing researchers together in a common space.

The CoLaborator includes basic equipment for ag tech startups to quickly begin putting their ideas to the test. Bayer support includes Environmental Health & Safety services and Biosafety site permits. Partnering with Bayer can also provide access to the global expertise and equipment of Bayer's research network.

Key Features

- Open lab space with flexibility to install mobile benches and biosafety hoods.
- Co-location at Bayer facility with a separate entrance, dedicated space, and controlled access determined by tenants.
- Lab infrastructure includes chemical safety hood and chemical storage cabinet. An adjacent equipment room provides space for larger tenant-provided equipment.
- Dedicated office area with cubicles and furnished conference room.
- A stand-alone IT network infrastructure.
- Waste disposal (including chemical and bio waste) is provided as well as all applicable environmental permits.
- Building security with 24/7 officers.
- Confidentiality agreements between Bayer and all clients.
- Local laboratory and business resources for startup companies (these are not associated with Bayer, or specifically part of the lease arrangement).
- UC Davis and associated core lab services located nearby.
